

Kamran Ali

ICT Engineer | Cyber Security Consultant | AI Systems Architect

Founder of Omni Digital Solutions • Building the future of Autonomous Intelligence.

Professional Evolution

2025 - Founder Omni AI

Building autonomous agents and intelligent networks for the future.

2024 - AI Builder

Synthesized hardware and software expertise into Artificial Intelligence.

2022 - Cyber Security

Deep dive into security protocols, zero trust, and threat mitigation.

2020 - ICT Engineer

Managed enterprise-grade information and communication technologies.

2018 - Network Engineer

Architected scalable network infrastructure and routing protocols.

2016 - IT Support

Transitioned to digital systems. Resolved critical user issues.

2014 - Electrician

Mastered hardware, electrical systems, and complex physical troubleshooting.

Core Arsenal (Skills)

Linux • Docker • Python • Next.js • Fortinet • Cisco • Mikrotik • Ubuntu • Windows Server • Azure • OpenAI • LLMs • Automation • Cyber Security • Networking • AI Agents • Supabase • Node.js

System Architecture (Projects)

• Omni AI

The core intelligence nexus powering all autonomous modules.

• Enterprise AI Platform

Scalable LLM infrastructure for corporate data reasoning.

• Telegram AI Assistant

Real-time conversational agent with deep API integrations.

• Healthcare Infrastructure

Secure, compliant networks optimized for medical data transit.

• Cyber Security

Zero-trust architectures blocking millions of unauthorized access attempts.

• Automation

Robotic Process Automation saving thousands of human hours.
